EDUCATION

Engineering Degree — Computer Science
EMSI Casablanca | 2021–2025

Scientific Baccalaureate (S)
Moulay Abdallah High School | 2021

PROFILE

Software engineer passionate about artificial intelligence, VoIP systems and full-stack development. Hands-on experience building AI-powered voice agents, designing microservices architectures and automating business workflows. Recently graduated from the engineering program at EMSI Casablanca, open to exciting opportunities where technology actually solves real problems.

PROFESSIONAL EXPERIENCE

AI Voice Agent Development — Final Year Internship

Ennova Group • Casablanca

Feb. 2026 – Present

- Designed and deployed an AI voice agent for commercial call automation, built on an architecture of 5 Python microservices orchestrated via LiveKit.
- Administered 2 VoIP platforms (3CX and Yeastar): configured SIP trunks, agent extensions and call routing rules.
- Implemented a real-time monitoring dashboard (Grafana) tracking 4 key call performance metrics.
- Developed an automated reporting module generating call transcriptions and delivering them by email after each session.
- Independently mastered 6 professional tools: Vicidial, Odoo (ERP), n8n (workflow automation), WordPress, 3CX and Yeastar.

Data Integration — Technical Internship

Expertise Data • Casablanca

Jul. – Sep. 2025

- Deployed a full Oracle environment (Linux 8, Oracle DB 19c, GoldenGate microservices) for real-time data replication.
- Configured the 3 GoldenGate replication processes: Extract, Pump and Replicat.

Customer Support CRM Platform — Development Internship

WebRasma & Rankin Digital • Casablanca

Jul. – Sep. 2024

- Built a full-stack CRM application for centralizing and tracking customer interactions.
- Reduced request handling time through data flow optimization and UI improvements.

ACADEMIC PROJECTS

SmartMove – Transport Delay Prediction System

EMSI

Dec. 2025 – Feb. 2026

- Built a real-time delay prediction engine aggregating 3 data sources: traffic, weather and incidents.
- Set up a microservices architecture with API Gateway and service discovery for inter-service communication.

JobMatch – Intelligent Recruitment Platform

EMSI

Mar. – May 2025

- Implemented job posting, application tracking and review management modules.
- Integrated a JobMatch assistant chatbot, reducing navigation time and improving the candidate experience.
