PROFILE

Software Engineering graduate (EMSI Casablanca, Class of 2026) with hands-on production experience across backend development, system architecture, and AI integration. Built and shipped complete systems during internships and a graduation project, from database design to deployed, user-facing interfaces. Comfortable working across the full stack - Node.js, Django, React - and integrating AI and VoIP systems. Quick to pick up new tools and looking for a software engineering role to contribute from day one.

TECHNICAL SKILLS

Languages: Java, Python, C / C++, HTML, CSS, JavaScript
Frameworks: .NET (MVC), Django, Node.js / Express, Spring Boot, React, GraphQL
AI & VoIP: 3CX, Yeastar, LiveKit, Vicidial, AI Voice Agents
DevOps & Tools: Docker, Grafana, n8n, Git, Jira
Databases: SQL Server, Oracle 19c, MySQL, PostgreSQL, Redis
Software: VS Code, IntelliJ IDEA, Draw.io, StarUML

PROFESSIONAL EXPERIENCE

AI Systems Architect & Software Engineer - Graduation Project (PFE) Ennova Group, Casablanca	Feb 2026 – Jun 2026
- Designed and built a multi-agent AI system for phone-based customer interactions: a Voice Agent handling live calls, a CRM Agent capturing and storing call data automatically, and a Monitoring Agent tracking system health and performance. - Automated post-call data capture, extracting key information from each conversation and writing it directly into the company's contact database, removing manual data entry. - Built a live dashboard for managers to monitor call quality in real time and generate reports on agent activity and performance.	
Data Integration - Technical Internship Expertise Data, Casablanca	Jul 2025 – Sep 2025
- Deployed a full Oracle environment (Linux 8, Oracle DB 19c, GoldenGate microservices) to support real-time data replication. - Configured all three GoldenGate replication processes - Extract, Pump, and Replicat - for continuous, low-latency data sync between systems.	
Customer Support CRM Platform - Development Internship WebRasma & Rankin Digital, Casablanca	Jul 2024 – Sep 2024
- Built a full-stack CRM application to centralize and track customer interactions in one place. - Streamlined request handling by optimizing data flow and simplifying the UI, reducing manual steps for support agents.	

ACADEMIC PROJECTS

SmartMove - Transport Delay Prediction System EMSI	Dec 2025 – Feb 2026
- Built a real-time delay prediction engine aggregating three live data sources: traffic, weather, and incident reports. - Designed a microservices architecture with an API Gateway and service discovery for inter-service communication.	
JobMatch - Intelligent Recruitment Platform EMSI	Mar 2025 – May 2025
- Implemented job posting, application tracking, and review management modules for an end-to-end recruitment platform. - Integrated an AI assistant chatbot into the platform, cutting down candidate navigation time and improving overall user experience.	

EDUCATION

Engineering Degree - Computer Science, EMSI Casablanca	2021 – 2026
Scientific Baccalaureate (S), Moulay Abdallah High School	2021
